

Andy Darmawan

Summary

I'm an experienced full-stack engineer who still enjoys building products hands-on. Recently, I've been focusing on AI-related development, including chatbot integrations and MCP, and I'm looking for opportunities where I can deepen my expertise and build AI-driven applications.

Experience

Freelance Frontend Engineer Sep 2025 - Present
Undisclosed (Upwork) Sydney City, AU, Australia

Working as a upwork freelancer for an undisclosed (due to NDA) australia company. below are the summary of what I've done:

- Integrate AI chat bot with MCP client.
- Handle authentication with AWS cognito.
- Implement form-heavy flow using react hook form.
- build a simple and customize-able dashboard.

Engineering Manager Oct 2018 - Feb 2026
Happy5 Jakarta

- Develop an Employee Appraisal System from scratch. Using rails for the back-end and React for the front-end side.
- Manage repository and implement various tools to help our development process.
- Helping mobile teams migrate their app from native (swift & kotlin) to react-native.
- Involved in ISO 27001 certification process as internal auditor.

Fullstack Engineer (Side Project) Oct 2024 - Dec 2025
Aula Simfonia Jakarta

- Build a Concert Hall Management that includes ticketing and various report.

Part Time Frontend Engineer Jun 2020 - Aug 2020
Rakamin

- implementing sentry & e2e testing
- creating interactive PDF with react-pdf.

Web Engineer (Side Project) Jan 2021 - Apr 2021
Toko Dewi

- Build a POS (point of sale) website and mobile app with laravel, react, and flutter.
